IN THE ABSTRACT:

Please replace the present abstract with the following abstract:

--ABSTRACT OF THE DISCLOSURE

C1 A method for producing an electron-emitting device having an electroconductive film with an electron-emitting region extending between plural electrodes, includes a step of forming the electron-emitting region in the electroconductive film, including a step of heating the electroconductive film, and a step of energizing the electroconductive film in an atmosphere in which a gas for promoting cohesion of the electroconductive film exists.--.

REMARKS

Claims 1-17 remain pending in the application, with Claims 1, 2 and 14-17 being independent.
